

# GSE Leak Location Smooth Geomembrane

METRIC

GSE Leak Location is a smooth spark-testable high density polyethylene (HDPE) geomembrane that contains an integrated, specially formulated conductive layer on the bottom surface of the geomembrane. GSE Leak Location can be easily tested for post-installation damage using equipment capable of performing spark testing in the field per ASTM D7240. This product is used in applications that require post-installation testing on the liner system to increase the quality of the project.

## AT THE CORE:

An HDPE geomembrane used in applications that require post-installation leak testing on the liner system to increase the quality of the project.

## Product Specifications

These product specifications meet GRI GM13

NOTES:

- <sup>(1)</sup>GSE Leak Location Smooth may have an overall ash content of 3.0% due to the conductive layer. These values apply to the black layer only.
- <sup>(2)</sup>Dispersion applies to near spherical agglomerates. 9 of 10 views shall be Category 1 or 2. No more than 1 view from Category 3.
- <sup>(3)</sup>Roll lengths and widths have a tolerance of ± 1%.
- GSE Leak Location Smooth is available in rolls weighing approximately 1,800 kg.
- All GSE geomembranes have dimensional stability of ±2% when tested according to ASTM D 1204 and LTB of <-77° C when tested according to ASTM D 746.
- \*Modified.

GSE is a leading manufacturer and marketer of geosynthetic lining products and services. We've built a reputation of reliability through our dedication to providing consistency of product, price and protection to our global customers.

Our commitment to innovation, our focus on quality and our industry expertise allow us the flexibility to collaborate with our clients to develop a custom, purpose-fit solution.
